The City shall design and construct a water distribution pipeline connecting the Kaw Lake Pipeline to the North Campus water treatment facility, and continuing from the North Campus to the East and South campuses (the “Water Backbone”). The Water Backbone shall be a city-owned utility asset, operated and maintained by the City or through the Patriot Utility District. The Hyperscaler shall pay the City a water delivery fee for the transport of treated water through the Water Backbone to the East and South campuses, as part of the Patriot Utility Tariff (Section 6.3). Developer shall cooperate with the City on engineering, routing, and easement acquisition for the Water Backbone, and shall grant or cause to be granted all necessary easements across Developer-controlled property at no cost to the City.

jgilbert • 2:42 PM, Mar 17 (PDT)

Does the IPP or developer charge for the treated water and the city charges for the transport on the water backbone?

Jason Singer • 7:41 AM, Mar 19 (PDT) New

Raw water to hyperscaler or IPP, backbone takes spec water to East and South at a separate wheeling charge.
